Norwich, Monday, Aug. 14, 1916.

The Circulation of The Bulletin

The Builetin has the largest circulation of any paper in Eastern Connecticut and from three to four times larger than that of any in Norwich. It is delivered to over 1,000 of the 4,053 houses in Norwich and read by ninety-three per cent. of the people. In Windham it is delivered to over 900 houses, in Putnam and Danielson to over 1,100, and in all of these places it is considered the local daily.

Eastern Connecticut has forty-nine towns, one hundred and sixty-five postoffice districts, and sixty ural free delivery routes. The Bulletin is sold in every town and on all of he R. F. D. routes in Eastern Connecticut.

CIRCULATION 1901, average..... 4,412

AVOID A STRIKE.

It is most unfortunate that the ederal Board of Mediation and Conillation is forced to namit that it has ot been able to accomplish its ob ect in its endeavor to bring about a agreement between the railroad sunngers of the country and the rul and brotherhoods relative to the dete is seriously involved and it is due digest indicates the more sensib or some consideration, instead

ry. Just what that would mean to suspense and to the people can readily be imagined even though such a state of affairs has not actually taken shade of affairs has not actually taken shade for the consequences. It is like-wise for the interest of those directive concerned. Fairness should govern any settlement that is reacher the heads of his hearers. mitted to extend to the whole counis what arbitration would establish. Let each side put forward the facts and abide by a first ducision in acordance therewith.

OUR PROSPERITY

According to Congressman Fittgerald of Massachusetts in his address efore the New York state democrats at Saratoga everything nationalwise is milk and honey. The country is enjoying prosperlty according to his view of the situation because of the ects of the present administration. He looks upon the business activity as is needed to get over it. being upon a firm basis and denies that it is of a temporary character. Whatever has been accomplished in

abroad which has brought about the existing conditions. Involved in strife it has been natural that the countries of Europe would look in this direct tion for many of their requirements. Big orders have been placed here. Ne cessities have been bought in this country even to the point of increas-ing the price on this side of the water and industrial activity has been encouraged because the war set up wall of protection which is as effective in certain ways as turiff legislation. To suppose, however, that this is going to continue after peace is declared and the European nations begin to turn their attention to for trade is preposterous. The doubling of our exports has been due entirely to the war and nothing else and way down in his heart Congressman Fitzgerald knows it.

DANISH WEST INDIES.

ale has been proposed but on this ccasion Denmark has been offered five times as much as when it was previously attempted and far more than the islands are actually worth. t likewise means the securing of a andsome sum for property which is now a constant drain on its resources for the islands are a long way from nome and their development is not being given the encouragement which would make them a source of profit

to the Danish government.

The only reason why this government has made such an offer as it has to Denmark is that the islands re advantageously located for the efense of the Panama canal. One of hem possesses a harbor which would nake a most valuable naval base and his country would prefer to part with millions that it has offered and win possession of these islands thich means about nine dollars apiece or each inhabitant of Denmark, than o leave them as a further menace through foreign aggression in that cality. If Denmark is wise and can se its own mind regardless of outside influence it will jump at its opportunity to turn a yearly expense into a handsome profit. Denmark is ot likely to find an administratio which would be inclined to be as lib ern! as the present one,

SYRIA'S DISTRESSING CONDI-

When it is realized what the conlone are in Syria it is not surpristhat there is a determined efbeing made to obtain the relief h is needed by those people. Sy like Armenia has been made to the ravages of the war and reess of such effects little is being by the Turkish government in way of extending relief. Syria has suffered from the fact

I of a great nation's conflict. To hold "its place in the sun," is the object of every business in the great fight for industrial and commercial supremacy.

To be able to hold "its place in the sun," is the supreme test of an asphalt roof. It is the sun, not rain or snow, that plays havoc with a roof. If it can resist the drying out process of the sun beating down upon it, day after day, the rain or snow will not affect it except to wash it clean and keep it sanitary.

Roofing

takes "its place in the sun" and holds it longer than other similar roofing, because it is made of the very best quality roofing felt, thoroughly saturated with the correct blend of soft asphalts, and coated with a blend of harder asphalts. This outer coating keeps the inner saturation soft, and prevents the drying out process so destructive to the ordinary roof.

The blend of asphalts used by "The General" is the result of long experience. It produces a roofing more pliable than those which have less saturation, and which are, therefore, harder and drier.

At each of the General's big mills, expert chemists are constantly employed to refine, test and blend the asphalts used; also to experiment for possible improvements. Their constant endeavor is to make the best roofing still better.

The quality of CERTAIN-TEED is such that it is guaranteed for 5, 10 or 15 years, according to thickness (1, 2 or 3 ply). Experience proves that it lasts longer. Behind this guarantee is the responsibility of the world's largest manufacturer of roofings and building papers.
